Genomes, Evolution, and Culture: Past, Present, and Future of Humankind Rene J. Herrera, Ralph Garcia-Bertrand, Francisco M. Salzano

This book combines recent information and discoveries in the field of human molecular biology and human molecular evolution. It provides an interdisciplinary approach drawing together data from various diverse disciplines to address both the more classical anthropological content and the current more contemporary molecular focus of courses. Chapters include a history of human evolutionary genetics; the human genome structure and function; population structure and variability; gene and genomic dynamics; culture; health and disease; bioethics; future.
