## **A New Unifying Biparametric Nomenclature that Spans all of Chemistry: The science of incorporating daily over 2,000 new names to a base of over 42 million compounds while still maintaining order**

Seymour B. Elk

As a byproduct of historical development, there are different, unrelated systems of nomenclature for "inorganic chemistry", "organic chemistry", "polymer chemistry", "natural products chemistry", etc. With each new discovery in the laboratory, as well as each new theoretical proposal for a chemical, the lines that traditionally have separated these "distinct" subsets of matter continually grow more blurred. This lack of uniformity in characterizing and naming chemicals increases the communication difficulties between differently trained chemists, as well as other scientists, and greatly impedes progress. With the set of known chemicals numbering over 42,000,000 (in Chemical Abstracts' data base) and continually growing (about 2,000 new additions every day), the desirability for a unified system for naming all chemicals simultaneously grows. Moreover, in order to meet the requirements of disparate groups of scientists, and of society in general, the name assigned to a given chemical should, not only uniquely describe that substance, but also should be a part of a readily recognizable order for the entire field. For these purposes, a topology-based "bi-parametric" system of nomenclature is herein proposed.

- In this book, a new nomenclature system is proposed
- The new nomenclature is applicable to a three dimensional world, and is internally consistent
- This nomenclature unifies ALL branches of chemistry, removing the need for various presently existing sets of rules

**From reader reviews:**

**Katie Phillips:**

Book is to be different for each grade. Book for children until finally adult are different content. As you may know that book is very important for people. The book A New Unifying Biparametric Nomenclature that Spans all of Chemistry: The science of incorporating daily over 2,000 new names to a base of over 42 million compounds while still maintaining order had been making you to know about other expertise and of course you can take more information. It is rather advantages for you. The guide A New Unifying Biparametric Nomenclature that Spans all of Chemistry: The science of incorporating daily over 2,000 new names to a base of over 42 million compounds while still maintaining order is not only giving you much more new information but also to get your friend when you truly feel bored. You can spend your personal spend time to read your publication. Try to make relationship using the book A New Unifying Biparametric Nomenclature that Spans all of Chemistry: The science of incorporating daily over 2,000 new names to a base of over 42 million compounds while still maintaining order. You never truly feel lose out for everything in the event you read some books.

**Edward Crosley:**

In this 21st hundred years, people become competitive in most way. By being competitive currently, people have do something to make them survives, being in the middle of the actual crowded place and notice by simply surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Yep, by reading a e-book your ability to survive improve then having chance to endure than other is high. To suit your needs who want to start reading the book, we give you this particular A New Unifying Biparametric Nomenclature that Spans all of Chemistry: The science of incorporating daily over 2,000 new names to a base of over 42 million compounds while still maintaining order book as beginning and daily reading book. Why, because this book is greater than just a book.

**Vikki Maynard:**

Spent a free time for you to be fun activity to try and do! A lot of people spent their leisure time with their family, or their friends. Usually they doing activity like watching television, gonna beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own personal free time/ holiday? Might be reading a book might be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the e-book untitled A New Unifying Biparametric Nomenclature that Spans all of Chemistry: The science of incorporating daily over 2,000 new names to a base of over 42 million compounds while still maintaining order can be great book to read. May be it could be best activity to you.

**Ricardo Hayward:**

E-book is one of source of understanding. We can add our information from it. Not only for students and also native or citizen want book to know the upgrade information of year to help year. As we know those textbooks have many advantages. Beside most of us add our knowledge, also can bring us to around the world. Through the book *A New Unifying Biparametric Nomenclature that Spans all of Chemistry: The science of incorporating daily over 2,000 new names to a base of over 42 million compounds while still maintaining order* we can get more advantage. Don't someone to be creative people? For being creative person must love to read a book. Just choose the best book that acceptable with your aim. Don't always be doubt to change your life at this time book *A New Unifying Biparametric Nomenclature that Spans all of Chemistry: The science of incorporating daily over 2,000 new names to a base of over 42 million compounds while still maintaining order*. You can more attractive than now.
