Geometric Analysis of the Bergman Kernel and Metric: 268 (Graduate Texts in Mathematics)

Steven G. Krantz

Geometric Analysis of the Bergman Kernel and Metric: 268 (Graduate Texts in Mathematics)

Steven G. Krantz

Geometric Analysis of the Bergman Kernel and Metric: 268 (Graduate Texts in Mathematics) Steven G. Krantz

This text provides a masterful and systematic treatment of all the basic analytic and geometric aspects of Bergman's classic theory of the kernel and its invariance properties. These include calculation, invariance properties, boundary asymptotics, and asymptotic expansion of the Bergman kernel and metric. Moreover, it presents a unique compendium of results with applications to function theory, geometry, partial differential equations, and interpretations in the language of functional analysis, with emphasis on the several complex variables context. Several of these topics appear here for the first time in book form. Each chapter includes illustrative examples and a collection of exercises which will be of interest to both graduate students and experienced mathematicians.

Graduate students who have taken courses in complex variables
and have a basic background in real and functional analysis will find this textbook appealing. Applicable courses for either main or supplementary usage include those in complex variables, several complex variables, complex differential geometry, and partial differential equations. Researchers in complex analysis, harmonic analysis, PDEs, and complex differential geometry will also benefit from the thorough treatment of the many exciting aspects of Bergman's theory.

From reader reviews:

Daphne Shew:

Reading a e-book tends to be new life style in this particular era globalization. With reading you can get a lot of information that will give you benefit in your life. With book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their reader with their story as well as their experience. Not only situation that share in the textbooks. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors these days always try to improve their skill in writing, they also doing some analysis before they write to their book. One of them is this Geometric Analysis of the Bergman Kernel and Metric: 268 (Graduate Texts in Mathematics).

John Edmondson:

The particular book Geometric Analysis of the Bergman Kernel and Metric: 268 (Graduate Texts in Mathematics) has a lot info on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. The author makes some research previous to write this book. This book very easy to read you can get the point easily after reading this article book.

Maria Forshee:

Your reading 6th sense will not betray you, why because this Geometric Analysis of the Bergman Kernel and Metric: 268 (Graduate Texts in Mathematics) guide written by well-known writer we are excited for well how to make book that may be understand by anyone who read the book. Written inside good manner for you, still dripping wet every ideas and publishing skill only for eliminate your personal hunger then you still question Geometric Analysis of the Bergman Kernel and Metric: 268 (Graduate Texts in Mathematics) as good book but not only by the cover but also from the content. This is one guide that can break don't judge book by its protect, so do you still needing another sixth sense to pick this kind of!? Oh come on your examining sixth sense already said so why you have to listening to one more sixth sense.

Margaret Conley:

With this era which is the greater man or woman or who has ability to do something more are more valuable than other. Do you want to become one of it? It is just simple solution to have that. What you are related is just spending your time almost no but quite enough to experience a look at some books. Among the books in the top record in your reading list is actually Geometric Analysis of the Bergman Kernel and Metric: 268 (Graduate Texts in Mathematics). This book which is qualified as The Hungry Mountains can get you closer in getting precious person. By looking up and review this reserve you can get many advantages.
