**Image Analysis, Classification and Change Detection in Remote Sensing: With Algorithms for ENVI/IDL and Python, Third Edition** Morton J. Canty

**Image Analysis, Classification and Change Detection in Remote Sensing: With Algorithms for ENVI/IDL and Python, Third Edition** introduces techniques used in the processing of remote sensing digital imagery. It emphasizes the development and implementation of statistically motivated, data-driven techniques. The author achieves this by tightly interweaving theory, algorithms, and computer codes.

See What's New in the Third Edition:

- Inclusion of extensive code in Python, with a cloud computing example
- New material on synthetic aperture radar (SAR) data analysis
- New illustrations in all chapters
- Extended theoretical development

The material is self-contained and illustrated with many programming examples in IDL. The illustrations and applications in the text can be plugged in to the ENVI system in a completely transparent fashion and used immediately both for study and for processing of real imagery. The inclusion of Python-coded versions of the main image analysis algorithms discussed make it accessible to students and teachers without expensive ENVI/IDL licenses. Furthermore, Python platforms can take advantage of new cloud services that essentially provide unlimited computational power.

The book covers both multispectral and polarimetric radar image analysis techniques in a way that makes both the differences and parallels clear and emphasizes the importance of choosing appropriate statistical methods. Each chapter concludes with exercises, some of which are small programming projects, intended to illustrate or justify the foregoing development, making this self-contained text ideal for self-study or classroom use.

### **From reader reviews:**

#### **Steven Deloatch:**

Nowadays reading books be a little more than want or need but also get a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The info you get based on what kind of publication you read, if you want send more knowledge just go with knowledge books but if you want sense happy read one using theme for entertaining including comic or novel. The particular Image Analysis, Classification and Change Detection in Remote Sensing: With Algorithms for ENVI/IDL and Python, Third Edition is kind of e-book which is giving the reader unpredictable experience.

#### **David Rivera:**

Reading a e-book can be one of a lot of pastime that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new information. When you read a book you will get new information due to the fact book is one of several ways to share the information or even their idea. Second, reading a book will make an individual more imaginative. When you examining a book especially fiction book the author will bring one to imagine the story how the people do it anything. Third, you may share your knowledge to others. When you read this Image Analysis, Classification and Change Detection in Remote Sensing: With Algorithms for ENVI/IDL and Python, Third Edition, you may tells your family, friends in addition to soon about yours guide. Your knowledge can inspire average, make them reading a book.

#### **Truman Gallagher:**

Reading a book tends to be new life style with this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Using book everyone in this world could share their idea. Publications can also inspire a lot of people. Plenty of author can inspire all their reader with their story or their experience. Not only the story that share in the ebooks. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors nowadays always try to improve their talent in writing, they also doing some investigation before they write with their book. One of them is this Image Analysis, Classification and Change Detection in Remote Sensing: With Algorithms for ENVI/IDL and Python, Third Edition.

#### **Jerry Brower:**

Do you really one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you find out the inside because don't ascertain book by its deal with may doesn't work at this point is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer might be Image Analysis, Classification and Change

Detection in Remote Sensing: With Algorithms for ENVI/IDL and Python, Third Edition why because the wonderful cover that make you consider regarding the content will not disappoint anyone. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly show you to pick up this book.
