Learning with Partially Labeled and Interdependent Data

Massih-Reza Amini, Nicolas Usunier

Learning with Partially Labeled and Interdependent Data Massih-Reza Amini, Nicolas Usunier

This book develops two key machine learning principles: the semi-supervised paradigm and learning with interdependent data. It reveals new applications, primarily web related, that transgress the classical machine learning framework through learning with interdependent data.

The book traces how the semi-supervised paradigm and the learning to rank paradigm emerged from new web applications, leading to a massive production of heterogeneous textual data. It explains how semi-supervised learning techniques are widely used, but only allow a limited analysis of the information content and thus do not meet the demands of many web-related tasks.

Later chapters deal with the development of learning methods for ranking entities in a large collection with respect to precise information needed. In some cases, learning a ranking function can be reduced to learning a classification function over the pairs of examples. The book proves that this task can be efficiently tackled in a new framework: learning with interdependent data.

Researchers and professionals in machine learning will find these new perspectives and solutions valuable. Learning with Partially Labeled and Interdependent Data is also useful for advanced-level students of computer science, particularly those focused on statistics and learning.

From reader reviews:

Mary Crouch:

In this 21st hundred years, people become competitive in every way. By being competitive at this point, people have do something to make all of them survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that often many people have underestimated the idea for a while is reading. Sure, by reading a book your ability to survive increase then having chance to stand up than other is high. To suit your needs who want to start reading a book, we give you that Learning with Partially Labeled and Interdependent Data book as beginning and daily reading reserve. Why, because this book is more than just a book.

Robert Hightower:

The guide with title Learning with Partially Labeled and Interdependent Data has a lot of information that you can discover it. You can get a lot of advantage after read this book. This specific book exist new understanding the information that exist in this e-book represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This particular book will bring you within new era of the glowbal growth. You can read the e-book with your smart phone, so you can read the item anywhere you want.

Harrison Colon:

Learning with Partially Labeled and Interdependent Data can be one of your nice books that are good idea. We all recommend that straight away because this book has good vocabulary which could increase your knowledge in words, easy to understand, bit entertaining but delivering the information. The copy writer giving his/her effort to get every word into satisfaction arrangement in writing Learning with Partially Labeled and Interdependent Data but doesn't forget the main stage, giving the reader the hottest as well as based confirm resource information that maybe you can be among it. This great information can certainly drawn you into brand-new stage of crucial pondering.

Pamela Acuna:

Do you like reading a e-book? Confuse to looking for your best book? Or your book seemed to be rare? Why so many query for the book? But any people feel that they enjoy regarding reading. Some people likes looking at, not only science book but novel and Learning with Partially Labeled and Interdependent Data or even others sources were given expertise for you. After you know how the truly amazing a book, you feel want to read more and more. Science publication was created for teacher or even students especially. Those books are helping them to bring their knowledge. In different case, beside science publication, any other book likes Learning with Partially Labeled and Interdependent Data to make your spare time far more colorful. Many types of book like this one.
