Marx's Concept of Money (Routledge Studies in the History of Economics) Anitra Nelson

This work relates Marx's theory of money to his overall political economy, and places it firmly within the wider context of his political and philosophical thought. It has for some time been held that there exists an epistemological break between the early 'humanist' and later 'scientific' Marx. However, in this ground-breaking study Anitra Nelson links Marx's concept of money to his early key concepts with particular reference to 'alienation'.
