In the Everglades, inches deep and miles wide, mystery abounds. What may look like a smooth, silent carpet of flowing grass is actually a world teeming with life. Amid tree islands and mangrove roots are animals on the prowl. A tuft-eared bobcat gives an eerie yooooowl, a raccoon carefully washes his food, an osprey guts a fish, and an alligator waits with shroudlike eyes for a redbelly turtle to swim too close. From creatures that fly to those that crawl, here is the cycle of life in the Everglades, presented in lilting, poetic words and lush, dramatic images. A perfect armchair tour through a surprisingly vast array of wildlife in a swampy strip unlike any other place on earth.
